

PROFESSIONAL THERMAL-STIMULATOR

TSM 1000 – HARMONY CLASS

HARMONY CLASS is a thermal-stimulator with its light design embraces the hairstyle and heats it uniformly which allows you to simply and quickly accomplish any application.

Its efficiency and the ability to choose whether to use or exclude ventilation and to leave full freedom to the hair dresser and allows him to reduce all times of work getting always perfect results

5 high efficiency fans placed at every single group radiant allow numerous options:

- Maximum flow of ventilation for quick drying.
- Minimum flow of ventilation for fast colours and meches.
- Possibility to exclude altogether the ventilation for technical precision work

Have 5 pairs of infrared lamps that can be individually adjusted to 3 positions of power (middle – off – maximum) which provide for choice of the best constant temperature on any hairstyle.

The LEDs for each switch showing the position and the level of radiant heating for each group.

Each heating group is made with parables reflective shiny stainless steel to reflect all the heat to the hair and ensure better energy efficiency and thus a secure economic savings

The possibility of being able to move the heating group closer or further away from the head and to control the power and the air-flow temperature provides a marked difference in heat perception for the same power, which eliminates any discomfort caused by excessive temperatures.

Features

- No. 5 fans, adjustable on 3 positions (maximum - minimum - off)
- No. 5 switches multi position to control the power of each heating group.
