

Professional hair drying hood

HDR199 Version – Automatic ventilation with timer, thermostat and temperature indicator light.
Double-loop stainless steel armoured resistance, power 1100 watt.
The greater development of the resistance allows for less stress hence increasing its duration.
Dome which can be opened, with a visor. Nylon hinge in the head at 20000 consecutive opening / closing cycles.
Available in several colours and versions with stand or wall arm.
115 volts version available upon request.

V HDR299 Version – 2 ventilation speeds controlled by an electronic card with noise filters, timer, thermostat and temperature indicator light.
The 1st speed reduces ventilation to 600 rpm to make the most of the hairstyles and technical styles.
The 2nd speed allows for time saving ultra fast drying.
Double-loop stainless steel armoured resistance, power 1100 watt.
The greater development of the resistance allows for less stress hence increasing its duration.
Dome which can be opened, with a visor. Nylon hinge in the head at 20000 consecutive opening / closing cycles.
Available in several colours and versions with stand or wall arm.
115 volts version available upon request.
